

AIAVT/IANH Annual Meeting

October 23, 2014/2.5 LU HSWs
MOJO Building/King Arthur Flour

White River Junction-Norwich Area

Photo: Jim Westphalen

Tour MOJO, a structure that underwent severe damage as the result of Hurricane Irene. Learn from an AIA member tenant about the specifics of the flooding, mitigation and remediation efforts, and how restoration of the structure has looked to better ensure resiliency for the future. Tour leader: *AIA Member Daniel Johnson.*

Next, learn about the design and construction of a major expansion at King Arthur Flour that includes the Baker's Store and Café, Education Center and the Bakery. The new building is a reinterpretation of the existing timber-frame structure expressed in a modern form. Both the building and the entry courtyard are crafted in the tradition of purposeful farm structures—grouped and carefully nestled into an agrarian landscape. The project received a 2012 AIAVT Merit Award for Design Excellence. *Presenters/Tour Leaders: AIA Members Richard Deane and Diantha Korzun.*

Gold Sponsor

4:00 Tour of Moffatt-Johnson (MOJO) Building, WRJ
5:30 Registration at King Arthur Flour (KAF)
6:00 Presentation & Tour of KAF Bakery, Café & Education Center (Norwich)
